GP3 Solution Report Template

---

1. Introduction

1.1 Context and Purpose

The company operates in the field of:
→ [Describe what the company does]

The core problem identified in GP2 is:
→ [State the problem clearly in 1–2 sentences]

This problem matters because:
→ [Explain business impact: inefficiency, lost value, risk, etc.]

The problem affects:
→ [Who is impacted: users, stakeholders, teams]

The proposed solution is:
→ [Short, clear description of your solution]

This solution is designed for:
→ [Target users]

This report delivers:
→ [Solution concept, validation process, business case, implementation feasibility]

---

2. Problem Context and GP2 Link

2.1 Company Context

The company operates within:
→ [Industry + operational environment]

The problem occurs in:
→ [Where in workflow or system]

This context makes the problem important because:
→ [Explain why it matters in this environment]

2.2 Problem Statement

Currently, the issue is:
→ [What is going wrong]

This failure occurs at:
→ [Where exactly it breaks]

Based on GP2 evidence, this happens because:
→ [Root cause explanation]

The stakeholders affected are:
→ [Who is impacted]

The consequences include:
→ [Inefficiency, lost value, delays, etc.]

2.3 GP2 Key Findings and Specifications

Key findings from GP2 include:
→ [List main insights]

The following patterns were identified:
→ [Recurring issues]

Stakeholders require:
→ [Needs]

Constraints include:
→ [Limits: time, resources, systems, etc.]

Evidence was gathered from:
→ [Interviews, case studies, repository analysis, etc.]

Success is defined as:
→ [What a “good outcome” looks like]

2.4 Translation into Design Requirements

The solution must:
→ [Functional requirements]

The solution must also:
→ [User requirements]

The system must:
→ [System requirements]

Prioritization:
→ High priority: [list]
→ Medium priority: [list]

---

3. Solution Concept

3.1 Overview of the Solution

The solution is:
→ [Explain clearly]

It is a:
→ [System / framework / tool / process]

It improves or replaces:
→ [What exists now]

This type of solution was chosen because:
→ [Why better than alternatives]

3.2 Objectives

The solution aims to:
→ [List goals]

Each objective links to a problem:
→ [Problem → Objective mapping]

Measurable outcomes include:
→ [Reduce X, improve Y, increase Z]

3.3 Scope

Included in the solution:
→ [What is covered]

Excluded from the solution:
→ [What is not included]

Exclusions were made because:
→ [Justification]

---

4. Solution Development Process

4.1 External Inputs

Sources used:
→ [Benchmarks, research, trends]

Other organizations do:
→ [What others do]

Key trends include:
→ [Relevant developments]

Adopted elements:
→ [What you used]

Rejected elements:
→ [What you did not use]

Reason:
→ [Why]

4.2 Ideation Process

Ideas were generated using:
→ [Methods used]

The range of ideas included:
→ [Describe variety and volume of ideas]

GP2 insights that influenced ideation:
→ [List]

Additional perspectives included:
→ Non users: [How they were considered]
→ Indirect stakeholders: [Who and why]

Reference: Appendix A

4.3 Concept Selection

Selected concepts:
→ [List]

Rejected concepts:
→ [List]

Selection criteria:
→ [Feasibility, impact, usability, etc.]

Final concept is better because:
→ [Justification]

4.4 Iteration Process

Total iterations:
→ [Number]

Iteration 1:
→ Change:
→ Reason:
→ Evidence:

Iteration 2:
→ Change:
→ Reason:
→ Evidence:

Iteration 3:
→ Change:
→ Reason:
→ Evidence:

4.5 Design Decisions

Key decisions:
→ [List]

Alternatives considered:
→ [List]

Trade offs made:
→ [What was sacrificed]

Reason:
→ [Why acceptable]

4.6 Stakeholder Validation

Stakeholders involved:
→ Direct: [Who + number]
→ Indirect: [Who + number]

They were selected because:
→ [Reason]

Validation occurred during:
→ [When]

Validation method:
→ [Interviews, testing, etc.]

Key insights:
→ [Findings]

Impact on design:
→ [What changed]

What could be improved:
→ [Limitations]

Reference: Appendix C

Good move — this is exactly how you keep the structure clean and aligned.

Since you removed Section 5, everything after it must shift **up by 1**, and references stay consistent.

Here is the **fully corrected numbering (clean, ready to paste):**

---

5. Final Solution Design

5.1 How It Works

Step 1:
→ [Explain]

Step 2:
→ [Explain]

Step 3:
→ [Explain]

5.2 Target Users and Fit

Users:
→ [Who]

Needs:
→ [What they need]

This solution addresses the problem by:
→ [Explicit explanation]

Mapping:
→ Need → Feature

5.3 Expected Improvements

Improvements include:
→ [List]

Quantified impact:
→ [Numbers if possible]

5.4 System Structure

Components:
→ [List]

Data flow:
→ [Explain]

Decision tracking:
→ [Explain]

Reference: Appendix B

5.5 Impact on Current System and Stakeholders

Current situation:
→ [How things work now]

Future situation after implementation:
→ [What changes]

Impact on direct stakeholders:
→ [Users, teams]

Impact on indirect stakeholders:
→ [Management, partners, ecosystem]

Potential positive effects:
→ [List]

Potential negative effects or risks:
→ [List]

---

6. Business Case

6.1 Value Proposition

Value:
→ [What it delivers]

Target users:
→ [Who]

Competitive advantage:
→ [Why better]

Alternatives are weaker because:
→ [Reason]

6.2 External Environment

Technology:
→ [Impact]

Legal:
→ [Impact]

Economic:
→ [Impact]

Trends:
→ [Impact]

Opportunities:
→ [List]

Risks:
→ [List]

6.3 Costs and Benefits

Costs:
→ Implementation:
→ Operational:
→ Indirect costs: [Disruption, transition, etc.]

Benefits:
→ Financial:
→ Non financial:

Translate non financial into financial:
→ [Explain]

Assumptions:
→ [List]

6.4 ROI

ROI calculation:
→ [Formula and result]

Assumptions:
→ [List]

Timeframe:
→ [Short, medium, long term]

Reference: Appendix E

6.5 Scenarios

Worst case:
→ [Describe]

Middle case:
→ [Describe]

Best case:
→ [Describe]

Most realistic:
→ [Which + why]

6.6 Long Term Impact and Sustainability

Long term benefits:
→ [Future value]

Impact on system or ecosystem:
→ [Wider effects]

Complementary systems or processes:
→ [What supports the solution]

Sustainability considerations:
→ [Environmental, social, operational]

---

7. Implementation Feasibility and Readiness

7.1 Strategy and Timeline

Steps:
→ [High level steps]

Roles:
→ [Who does what]

Timeline:
→ [Overview]

Reference: Gantt chart

Alternative scenarios:
→ [List]

Chosen scenario because:
→ [Reason]

Stakeholder involvement and buy in:
→ [Explain]

7.2 Risks and Mitigation

Risks:
→ [List]

Likelihood and impact:
→ [Explain]

Mitigation:
→ [Strategy]

7.3 KPIs

Metrics:
→ [List]

Success measured by:
→ [How]

Timing:
→ [When]

---

8. Conclusion

The problem addressed is:
→ [Restate]

The solution provided is:
→ [Restate]

The value created is:
→ [Restate]

Final statement:
“This solution is grounded in GP2 findings, validated through iterative development, and supported by a structured business case and implementation plan.”

Appendices

Appendix A – Idea Map
Appendix B – Prototype Details
Appendix C – Validation Evidence
Appendix D – Iteration Log
Appendix E – Business Case Calculations
Appendix F – Supporting Research
